

Detailed Full-Stack API Architecture Flow

Client Layer

- [Browser/Mobile Client]
 - (1) UI Event Triggered
 - User Interaction (Click/Submit)
 - Automated Action (useEffect/Lifecycle)
 - (2) Frontend Framework (React/Vue/Angular)
 - Component State Update
 - Props Validation
 - Event Handler Execution
 - (3) API Client Layer
 - Request Configuration
 - Headers Setup (Auth/Content-Type)
 - Request Body Formation
 - Query Parameters
 - HTTP Client (Axios/Fetch)
 - Request Interceptors
 - Response Handlers
 - Error Management

Network Layer

- [API Gateway/Load Balancer]
 - (4) Request Processing
 - SSL/TLS Termination
 - Request Routing
 - Load Distribution
 - (5) Security Layer
 - DDoS Protection
 - Rate Limiting
 - IP Filtering

Server Layer

- [Web Server] (Node.js/Express)
 - (6) Entry Point (app.js/index.ts)
 - Server Configuration
 - (7) Middleware Chain ↓
 - Request Parsing (Body/Cookie)
 - CORS Handling
 - Authentication
 - Request Logging
 - Error Handling
 - (8) Router Layer ↓
 - Route Matching
 - Parameter Extraction
 - Handler Assignment
 - (9) Controller Layer ↓
 - Request Validation
 - Business Logic Coordination
 - Response Formation
 - (10) Service Layer ↓
 - Business Logic Implementation
 - External Service Integration
 - Data Layer Interaction

Data Layer

- [Data Access Layer]
 - (11) Model Layer
 - Schema Definition
 - Validation Rules
 - Model Methods
 - (12) ORM/ODM Layer
 - Query Building
 - Relationship Handling
 - Transaction Management

- └─ (13) Database Operations
 - └─ Query Execution
 - └─ Connection Pooling
 - └─ Result Processing

<> Response Flow

- [Response Generation] ↑
 - └─ (14) Data Transformation
 - └─ Model Serialization
 - └─ Data Formatting
 - └─ Response Structure
 - └─ (15) Response Processing
 - └─ Status Code Selection
 - └─ Header Configuration
 - └─ Response Compression
 - └─ (16) Client Reception
 - └─ Response Parsing
 - └─ State Management Update
 - └─ UI Re-rendering

🛡️ Cross-Cutting Concerns

- [Global Error Handling]
 - └─ Client-Side Errors
 - └─ Network Issues
 - └─ Validation Errors
 - └─ UI State Errors
 - └─ Server-Side Errors
 - └─ Runtime Exceptions
 - └─ Database Errors
 - └─ External Service Errors
 - └─ Security Measures
 - └─ Input Sanitization
 - └─ XSS Prevention
 - └─ CSRF Protection

⚙️ Performance Considerations

- [Optimization Layer]
 - └─ Client-Side
 - └─ Request Caching
 - └─ Response Memoization
 - └─ Bundle Optimization
 - └─ Network Layer
 - └─ Connection Pooling
 - └─ Request Compression
 - └─ CDN Integration
 - └─ Server-Side
 - └─ Query Optimization
 - └─ Cache Strategies
 - └─ Resource Pooling
